

Roadmap for the scoping review

Table of contents

Bibliography	1
--------------------	---

The end goal is a published scoping review. How we get there is based on completing tasks and steps along the way. This document is meant as a starting point to know what needs to be done and what has been done.

1. Issue 12: Tasks to do for completing project. This is the main issue to get an big overview of what has been done and what needs to be done.
2. Issue 32: Tasks tracking for extracting references from sources. This issue shows more detailed view of what sources we've extracted and what still need to be done.
3. Issue 14: PRISMA-ScR Checklist (for both protocol and review itself). This issue tracks what needs to be included in the final scoping review paper when we start writing it.

This document is continually evolving, so check back to it often! :D
