Bibliography	1
--------------------	---

This section lists additional files that we used or created in the process of doing this scoping review project.

- Instructions: This document has instructions for doing a scoping review as well as the PRISMA-ScR checklist.
- Full-text reviews: These documents contain each author's review of the full-text documents we selected after the title and abstract screening, as well as some grouping of them into themes and a listing of the titles of the documents we selected at each phase of the project.
- Charting: This contains the structured charting documents we used for each full-text document we selected.
- Reflections: These are our informal reflections we wrote in to help us identify challenges and ways we improved on that.
