Project Roles

Table of contents

Many roles can (and will) be done by several people, but we try to at least have a "primary" person assigned to them.

- *Coordinator*: Assigned to **Luke**. Responsible for tracking progress, setting tasks, reviewing content, setting up meetings, and keeping an overview of what's going on in the project.
- *Code reviewer(s)*: **Everyone**. Responsible for checking reproducibility, that code runs, is readable, and generally well structured.
- *Writer*: **Everyone**. Mainly responsible for writing the report, including coordinating who needs to contribute specific text to each section.
- *Editor*: Assigned to **Daniel**. Responsible for reviewing, proofreading, and editing the report.
- *Table generator*: Assigned to **Mario**. Responsible for brainstorming any potential tables we might need or use and then creating them for the report.
- *Visualization generator*: Assigned to **Daniel**. Like the table generator, responsible for brainstorming possible figures and creating them for the report.
